01 — WELDED GRATING

Welded grating

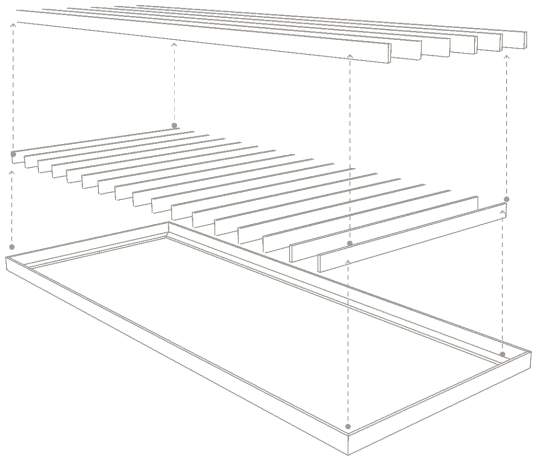

Electro-welded grating

One of the most widely used industrial products thanks to its structural strength, and very common for building floors.

This electro-welded grating is a steel structure made of hot-dip galvanized steel bars placed perpendicular to the grating supports.

ISOMETRIC VIEW · EXPLODED

Finish

- Hot-dip galvanized
- Painted

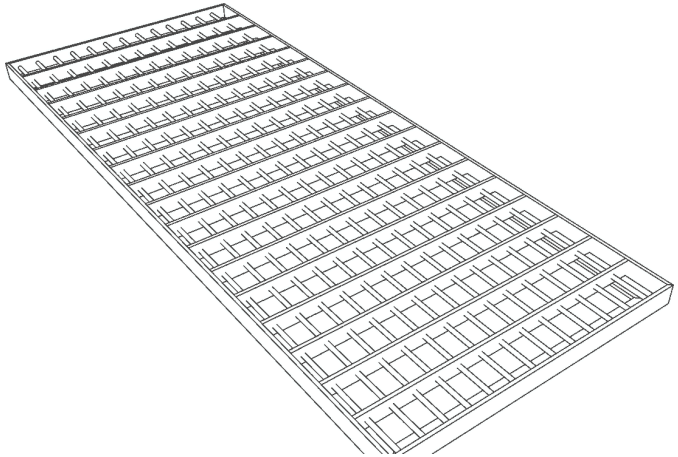

02 — GRATING

Grating

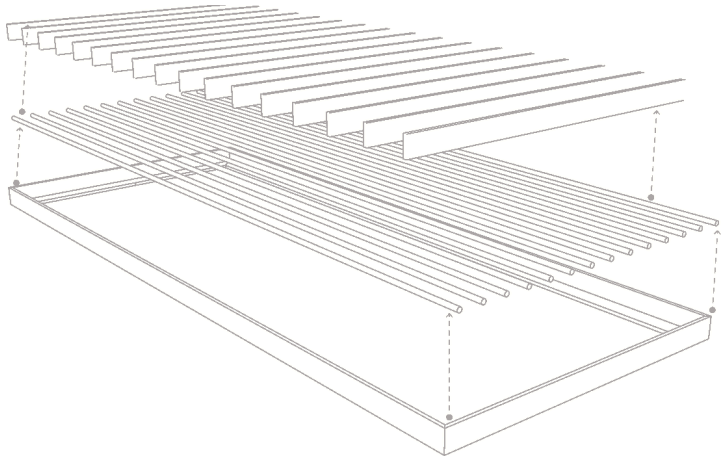

Electro-forged grating

Galvanized steel grating floor, ready to use, with high load capacity and great strength.

A steel structure made by electro-forging a (serrated) bearing bar to a twisted cross rod that holds the bars together, forming an extremely strong, durable grid.

Finish

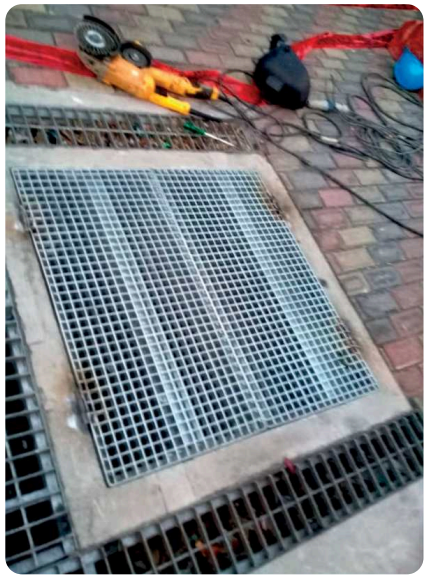

- Hot-dip galvanized
- Painted

03 — ON-SITE INSTALLATION

Completed projects

Unloading and installing grating at an electrical substation.

04 — PLATFORMS AND CHANNELS

Completed projects

05 — QUALITY CONTROL

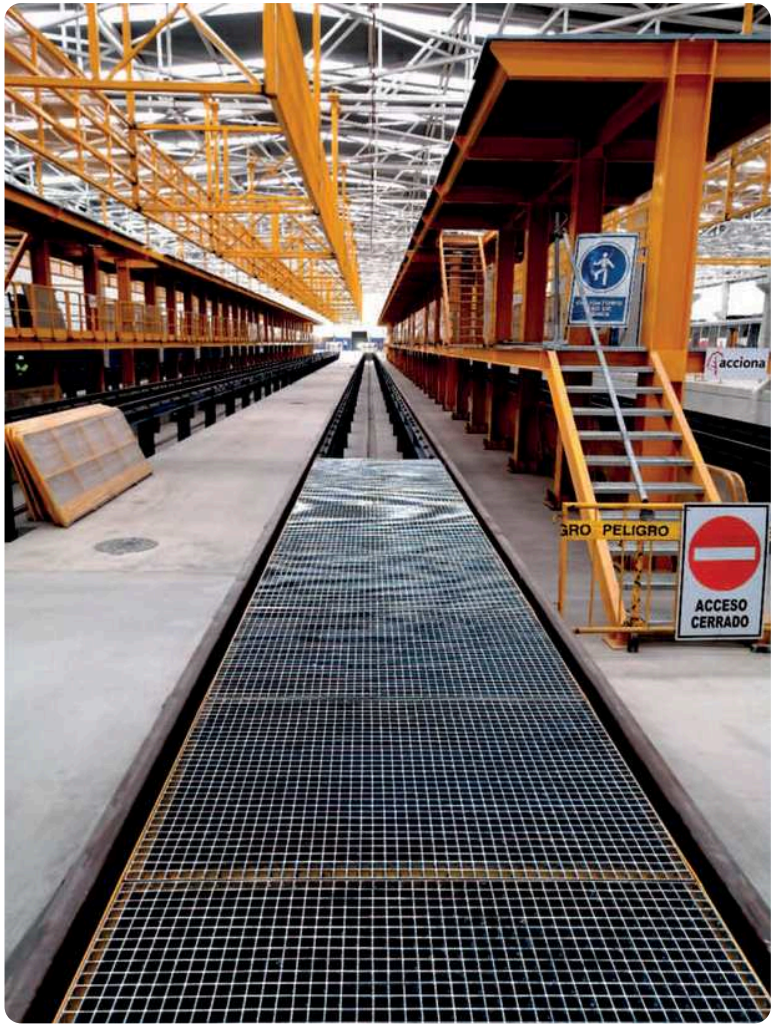

Completed projects

Framed channel cover grating.

On-site galvanizing thickness measurement.

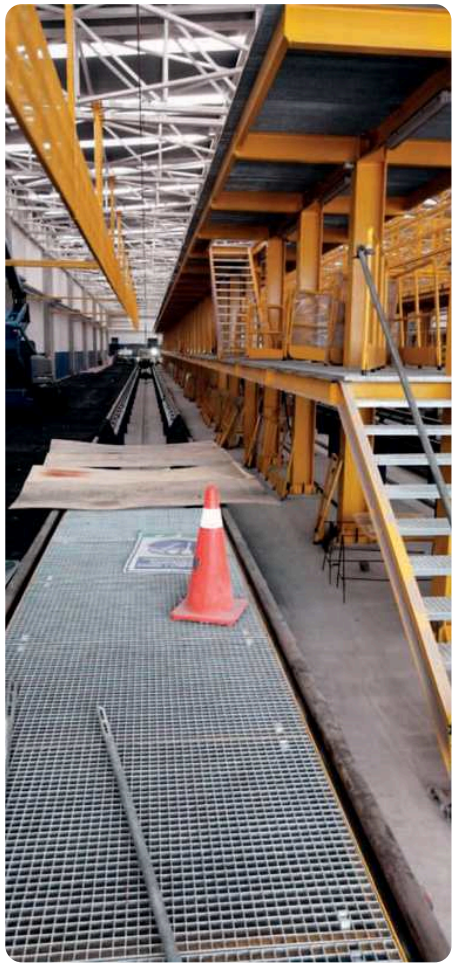

Grating walkway at railway workshops.

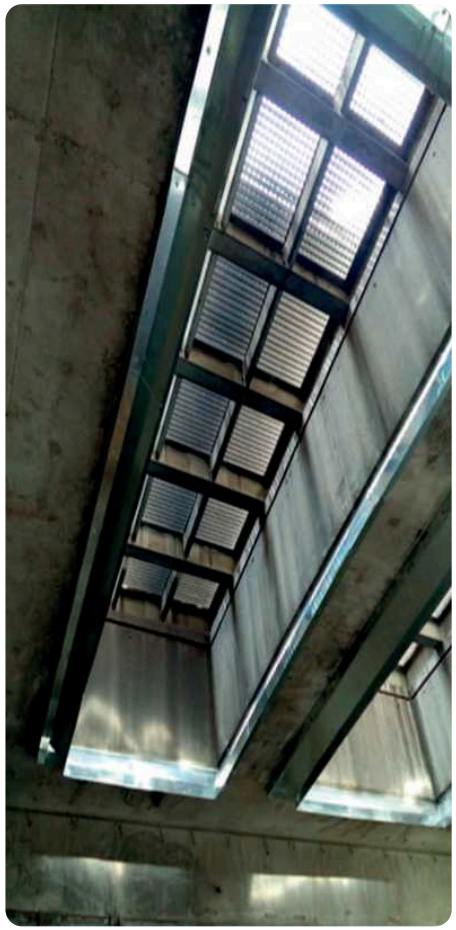

06 — WALKWAYS AND PITS

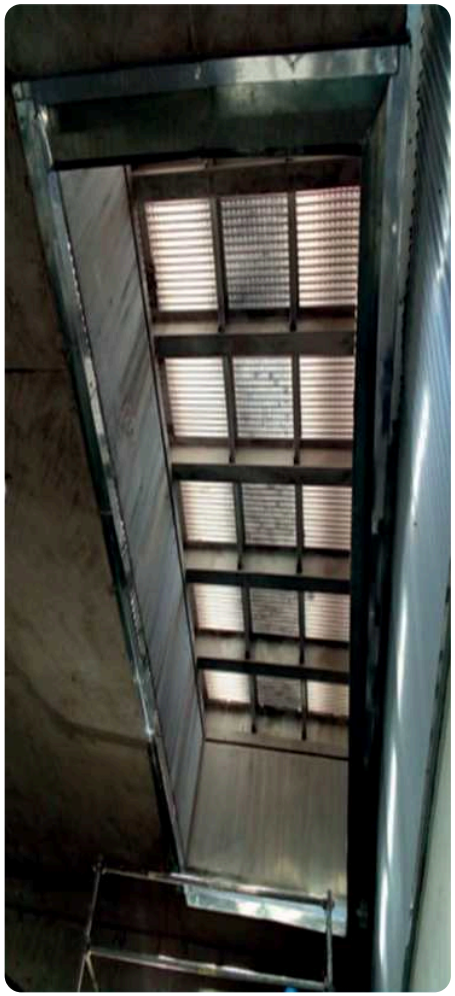

Completed projects
